

# Human Toxicology: From Exposure to Disease

## *Humantoxikologi: Från exponering till sjukdom*

### How can environmental pollutants cause diseases in humans?

In this course we will learn about:

- General toxicology, the concept of dose response, toxicokinetics
- Genetic and epigenetic mechanisms of toxicology
- Chemical analysis of biomarkers in urine and blood
- Risk assessments and environmental epidemiology

### Interested?

Apply from march 15 to april 17 via [www.antagning.se](http://www.antagning.se)
