

SYMPOSIUM

Disruptive visions

A future with autonomous vehicles?

11 DECEMBER 9.00-12.00. PUFENDORF IAS, BISKOPSGATAN 3, LUND

Many cities and regions are currently conducting pilots of autonomous vehicles (AVs). While the activities have increased, the developments and visions surrounding AVs remain controversial, and the potential role of AVs in broader urban development is a subject of debate. In this seminar, we use two AV pilots (BASE and Barkaby) as a starting point to discuss innovations within the framework of visions and systemic change.

Program

09.00-10:30 **Two cases of autonomous vehicles**

Hello and welcome

Dalia Mukhtar-Landgren, researcher Lund Univ.

The BASE-prestudy (more info [here](#))

Martin Güll Project manager, Lunds kommun

The Barkaby-pilot (more info [here](#))

Kelsey Oldbury, researcher VTI

Break (with fika)

10:50-12:00 **On change**

Working on visions of future mobility

John Hultén, Director K2 (The Swedish knowledge centre for public transport)

Disruptive change

James White, researcher Lund Univ.

Incremental change

Andrew Karvonen, Prof., Lund Univ.

Summarizing discussions
