Research

I have been a member of the WASP Graduate School Management group since 2019 and since 2021 I am WASP Affiliated Faculty, as well as a member of the steering group of the COMPUTE Graduate School at Lund University. Since 2022, I am Associate Editor for the ACM Transactions on Human-Robot Interaction (THRI).

My research interest lies in the area(s) of Artificial Intelligence, Cognitive Science and Human-Robot Interaction, more specifically in building robotic systems that can communicate appropriately with human users. This is relevant to both industrial and service robotic systems, but even to interfaces for the surveillance of (semi)autonomous systems (cars, drones, ships) as the demands on flexibility, ease-of-use and human-comprehensible setup and configuration are increasing. During my PhD project on Human Augmented Mapping I observed several interesting phenomena in an interactive home tour scenario, which inspired my further research on firstly detecting and possibly finding solutions to ambiguities arising from mismatches in human and robotic expectations and understanding of concepts. In short, my research tries to establish common ground between humans and machines (robotic systems) by applying AI methods to analysing and modelling the interaction between humans and robots or other (autonomous) systems.

Qualifications

Computer Science, Readership, Faculty of Engineering, LTH
Award Date: 2019 Jun 4

Computer Science, PhD, Human-Robot Interaction and Mapping with a Service Robot: Human Augmented Mapping, KTH Royal Institute of Technology
Award Date: 2009 Jan 27

Employment

Project manager, Director of third cycle studies, Head of department

Department of Computer Science
Lund University
Lund, Sweden
2009 May 1 → present

PhD Student

KTH Royal Institute of Technology
Stockholm SE-100 44, Sweden
2004 Jan 1 → 2009 Jan 31
