Research

Communications Officer and former journalist with a Bachelor of Arts from various faculties, majoring in linguistics. I work, basically and literally, with finding the right words for the right opportunity. I have worked as a reporter and editor, for several years with my own business, until I started working in communication. I still very much enjoy writing articles and meeting, sitting down, and talking to people. I aim to make things easy to understand and to cut the crap without being rude. I also try to live by the rules: Keep the talent happy, avoid sludge, and respect people's time and diversity. I have worked at NanoLund since January 2020 and am usually there on Wednesdays, Thursdays, and Fridays. The rest of my working hours are spent in the Department of Computer Science at the Faculty of Engineering, LTH, Lund University.
