Research

Studies urban hydrological processes, especially during extreme rain, i.e. how torrential rain affects the stormwater network and how better stormwater management can reduce the risk of flooding. In my PhD thesis, I looked at the consequences of torrential rain in Malmö. I am particularly interested in blue-green infrastructure (NBS, SUDS, etc.) – both how well they work technically in different rains and how urban planning needs to be changed to support implementation of more solutions. For sustainable and effective climate change adaptation, more elements of blue-green solutions are required.

Qualifications

Water Resources Engineering, PhD, Urban, pluvial flooding: Blue-green infrastructure as a strategy for resilience, Division of Water Resources Engineering

2012 Sept 3 → 2018 Sept 14

Award Date: 2018 Sept 14

Environmental engineering, M.Sc. in Engineering, Faculty of Engineering, LTH

2003 Aug 22 → 2008 Jan 1

Award Date: 2008 Jan 1
